About rPET

Synergy Packaging now introducing rPET packaging available for our range of products. We purchase raw material from the Australian and overseas suppliers to make our products, which is safe to use in all the areas of packaging. rPET is recycled polyethylene terephthalate. This is made up of **100% recycled** content. We specialise our packaging by making a positive impact on the environment.

Minimum Order Quantity

We require all orders to be above 10,000 units for a non-stock items and for all products to be purchased in full box quantities. However minimum order quantities will be 5 units for stock rPET bottles.

Cost

rPET raw material cost is higher compared to Virgin PET, as it needs to be recycled. Hence rPET products can be approximately 5% more expensive than virgin PET.

Lead-Time

It takes 4-6 weeks to manufacture a rPET product. Please note for out of stock items and custom made products lead times may be longer. Please inquire with any of our office staff for stock availability and lead times for your products.

Colour

Please note there will be colour variations in products. Please check your products before you make decision.

For all rPET products, specification sheets, quotes and inquiries please email - sales@synergypack.com.au or please call our office on **(03) 9338 2626** to speak with any of our office staff for further information.
